Mr. Sydney P. Noe
Sec. American Numismatic Soc'y

Dear Sir.

I thank you for your letter of Dec. 19th & for your kind Season's greetings which I heartily reciprocate. —

I sent you all the duplicates I could spare last year, and as I have done very little collecting of coins since

settling into our new house I have nothing to offer to your Christmas gifts for this season. With regrets. But assuring you that I shall not forget your food custom.

I am Yours Sincerely,

Allan Forde

Dear Mr. Navrogordato:

Thank you very much indeed for your letter of August 5th and for your kind words of approbation for the recent publication of Part II of my study of The Coinage of Metapontum. It is very gratifying to have such commendation from so experienced a numismatist as yourself and I appreciate your writing.

Thank you too for sending me the cast which enables me to confirm what I anticipated from reading your letter, before looking at the cast. This issue, because of the letter beneath the symbol and because of the symbol which from other specimens it is possible to complete as an owl devouring a grass-hopper, seems to belong with a stater having the same symbol which I believe to have been struck after the death of Alexander of Epirus, that is, between 330 and 300. The style, as you will note, is much more finished than on the earlier pieces illustrated on my Plate 27. The issue of the pieces of the late type must have been a fairly extensive one for a considerable number of specimens have come down to us and although I have not yet worked over this section finally, the number of dies is a considerable one and very complicated.

Thank you for offering casts of your bronze issues of this mint; I should be very glad indeed to have these at your convenience. The series is a very interesting one and I hope to take it up, after I have finished with the silver. I appreciate your generous offer to aid me. If it is simpler for you to send the wax impressions, rather than to complete the making of the casts, that would be perhaps a simplification of the work for you, if you use sealingwwax for your casts.

Very sincerely yours,

SN:JG

Dear Mr. Roe.

Your letter of Aug. 15th. for which my best thanks, reached me yesterday & I am replying thus promptly because I am just going away for ten days or so & fear that if I left my reply till after I return it might be still further delayed.

I am enclosing sealing-wax impressions of the seven bronze Metapontines in my collection with such notes as I thought might be useful to you.

I quite follow what you say about my symbol. The style is certainly later than that of the coin illustrated in your Pl. XXVII. the little image of which I now find you an impression (my № 138) is very similar in all respects. It would be interesting to me if the symbol is also the same as seems quite possible. —

Excuse more for the present as I am rather pressed for time. But I shall always appreciate a letter from you. I wrote to Mr Newell at the beginning of the year about the case of a Mint Master that I wanted, but never had a reply. I should feel obliged if you could ascertain

Will this be [illegible] Please note my letter dated 7 Feb. Sincerely yours

Dear Mr. Mavrogordato:

Thank you very much indeed for your letter of August 25th and for the impressions of your Metapontine bronze issues which accompanied it. I am very glad indeed to have these because with the exception of the large national collections few appreciate the importance of these minor bronze issues. Hitherto they have not come within the scope of my investigations but I shall soon have to study them carefully.

I spoke to Mr. Newell about your letter and he explained that the reason for his being unable to answer was that he had to refer your inquiry to another individual who has probably been absent on vacation but who has not responded in anyevent. I am sure that you will have a response as soon as Mr. Newell is in a position to make one.

Very sincerely yours,

SN:JG
